SkyRadar Teams with Edward Fullerton of Hjalta Sonstane to Transform ATSEP Training for All

A bold new collaboration is taking flight. SkyRadar joins forces with Edward, an Air Traffic Engineer and CNS/ATM expert, to accelerate innovation in ATSEP training worldwide. The partnership blends decades of frontline CNS/ATM experience with SkyRadar's forward-thinking training vision, delivering world-class, ICAO-aligned education for ATSEP, CNS, and ATM professionals across regions.

Why this matters

- Elevates ATSEP training with ICAO-standard curricula, regulatory alignment, and modern delivery methods.
- Leverages Hjalta's proven track record in designing and delivering targeted courses for 60+ staff and managing complex training operations.
- Expands global access to high-quality CNS/ATM education, from regulators and ANSPs to airlines and airports.
- Builds a sustainable pipeline of competent professionals, ready to meet today's safety, efficiency, and technology demands.

Hjalta Sonstanes: Deep expertise in CNS/ATM engineering, safety and regulatory compliance, and leadership in training delivery across EU, MENA, and UK.

SkyRadar: Innovator in ATSEP education and CNS/ATM technology, focused on accessible, impactful professional development.

This partnership invites regulators, ANSPs, airports, and training providers to connect for pilot programs, curricula development, and tailored training delivery that meets local regulatory requirements while upholding global best practices.
